25. Using State Regents' definition of liberal arts and sciences (quoted below), characterize the course as follows:
   X Liberal arts and sciences
   Non-liberal arts and sciences

"The liberal arts and sciences are defined as those traditional fields of study in the humanities; social and behavioral sciences; communications; natural and life sciences, mathematics; and the history, literature, and theory of fine arts (music, art, drama, dance). Courses in these fields whose primary purpose is directed toward specific occupational or professional objectives, or courses in the arts which rely substantially on studio or performance work are not considered to be liberal arts and sciences for the purpose of this policy. Courses required for the General Educational Program are not necessarily synonymous or mutually exclusive with the liberal arts and sciences." State Regents Policy and Procedures, Chapter 2, Section 5, "Degree Requirements" part 1, (2), P. II-2-86

26. Please provide a concise, yet comprehensive, statement that explains the reasons for requesting the new course. Include documentation or assessment information supporting the specific
request (if possible). Indicate the expected source of student enrollment (majors, minors, programs etc.)

In the department’s Self-Study for Continuous Improvement (SSCI), external reviewers suggested (a) a greater breadth of courses be offered, (b) a greater depth of courses be offered, and (c) courses devoted to multicultural and diversity issues. This course will help meet these suggestions. Moreover, according to national data, this is a typical specialty course in the area of psychology.
