10. The reason(s) for this change are based on which of the following: (Check all that apply; explain and document in Question #11)

- Specialized Accreditation
- SSCI (Self Study for Continuous Improvement)
- Benchmark (e.g. comparison to peer institutions)
- Assessment Data
- Faculty Knowledge/Discipline Expertise
- Advisory Board/Outside Professional Group
- Other School of Design curriculum mapping

11. For all items checked in Question #10, please provide a concise, yet comprehensive, statement that explains the reasons for requesting the change including any necessary documentation. (The information provided here will be submitted to the OSRHE)

It is the consensus of the School of Design Director, School of Design Graduate Program Division Head, and the graduate Design faculty that the current program is too loose and undefined. Students are often unsure of what to take, and they have difficulty finding a focus. This program change will simplify and specify a track to graduation, yet still allow each student to define their practice. Additionally, we hope it will allow for classes to make so the faculty will be compensated for their time and effort. We would like to require a Fall start to facilitate future cohorts and to aid in unifying students' experiences.

12. State Regents Math Initiative questions: (For undergraduate degree programs only)

As part of the broader work of the Mathematics Success Initiative, the Math Pathways Task Force has identified four gateway mathematics courses that are suitable general education mathematics course options. These courses, College Algebra/Pre-Calculus, Introduction to Statistics, Functions and Modeling, and Quantitative Reasoning, are included on the Course Equivalency Project transfer matrix and provide rigorous mathematical content that is more relevant and appropriate for specific academic majors.

1. Which mathematics course is required as part of the general education requirements? If the program allows for multiple gateway mathematics course options, provide a rationale for each.

   N/A

2. Describe how the mathematics course was selected and how it best meets the needs of the program’s students.

   N/A

3. How does this mathematics course articulate with your partner institutions?

   N/A
