Course description:

As it appears in the current catalog. (required)

This course focuses on building financial models based on the principles of corporate finance to solve common financial management problems related to asset valuation, investment decisions, financing decisions, financial planning, current assets management and risk assessment. The course uses MS Excel and other programs and includes a number of hands-on assignments that use current data. The emphasis will be on applications and practice rather than on theory. The instructional approach for the course will include a minimum of lectures, plenty of discussions, and a number of model building exercises. Extensive use of currently available firm-specific and industry and macro and market data will be used for the model applications.

Existing: _____

As it will appear in the next catalog or indicate no change. (Please use standard American English including full sentences.)
Course descriptions only. Do not include prerequisites or enrollment restrictions, these should be added under questions 9-15.

Proposed: No change.
